

ART4PSY project

The ART4PSY Project is a European Project aiming to explore the use of Art as a means for building understanding between people with severe mental health illness and the general population.

ART4PSY will promote social inclusion, fight stigma and increase public awareness regarding the talents and skills of artists with mental health problems.

Additionally it is going to promote the transnational circulation of cultural and creative works produced by mental health patients and will empower them to explore the possibility for a career in the cultural and creative sector.

// The vision of the ART4PSY project is to set up a sustainable European cooperation for using art as a means to promote social inclusion for mental health patients and create new career opportunities. //

Innovative Activities & Tools

ART4PSY Festival

A three-days festival that will take place in Greece, Belgium and the Czech Republic. The Festival will include the "European Theatrical Performance", a theatrical play co-produced by the mental health users of the theatrical groups of the three countries, as well as Painting and Photography exhibitions.

European ART4PSY Toolkit

A practical guide for practitioners. The toolkit will present methodology, activities, good practices and tools, in order to facilitate mental health users' access to artistic career opportunities and social inclusion through Art.

Digital Library

An online library where artworks of mental health users will be stored and promoted.
